

To print your Asset Deck, set your double-sided printer to **short-edge binding** and print on a cardstock material. Then, with a sharp utility knife and straight edge, use the crop marks as guides to trim the cards apart.

If you don't have a double-sided printer, print the pages individually and then glue them back-to-back with a thin, even coat of adhesive. Before glueing, hold the back-to-back sheets up to a light source to ensure they are lining up correctly.

The gutters between the cards give you a little bit of leeway if the two sides do not line up exactly.

THE ASSET DECK

This deck of cards is meant for use by Cypher System players, not game masters (GMs). At the end of an adventure, at the end of an important encounter, or really anytime they wish, GMs award a player with a card from this deck. This can be a random card or not—it's up to the GM. The card provides an asset that the player can hang onto and play whenever they wish, on a specific task. The asset offered by the card is above and beyond any other (but still can never decrease a task's difficulty by more than two steps).

These cards allow a character to be a bit inspired even when the player is not, and to have a bit more influence in the game.
